

Jeff Boyle Biography

Jeff was born in El Paso TX, grew up in Southern California. Has always been interested in all things mechanical, especially cars and motorcycles. After high school, worked as shop foreman rebuilding smog pumps and electrical components for Datsun automobiles. Moved to Grass Valley CA in 1981 to open his own business rebuilding starters and alternators. Started racing at the Bonneville Salt Flats in his 650cc 1955 BSA motorcycle. Married wife Linda in 1987. They have three children, and three grandchildren. Met Denis Manning in the early 1990s and volunteered to help with his latest streamliner project, Tenacious. Designed and fabricated wiring harness, and traveled to Bonneville numerous times as crewmember.

In 2000, design and construction began on new streamliner "Seven". Jeff assisted on many aspects, including body mold construction, laying up of the composite body, and an entirely new wiring harness. Again, he enjoyed trips to the Salt for tests, and of course, the record setting runs. It must be noted that Linda has been very patient throughout these times!
